

DetQ

Deterministic Query Framework

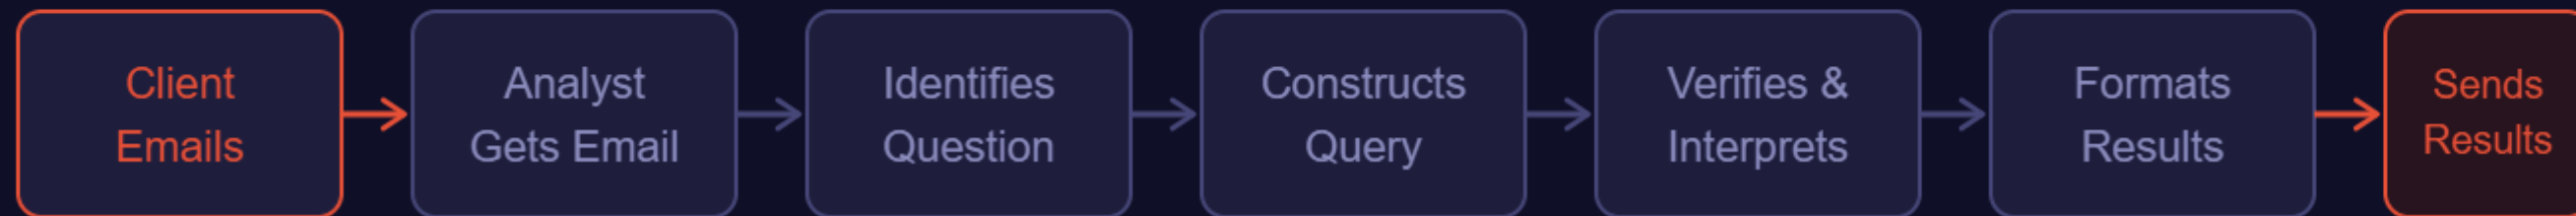

Corporate Bond Analytics Presentation by
[Presenter Name]

The Problem

Analyzing current workflow inefficiencies

CURRENT WORKFLOW — 7 MANUAL STEPS PER QUERY

Time per query by complexity

Simple
2–5 min
routine data pulls

Medium
15–20 min
filtered queries

Complex
60–90 min
compound analysis

Analysts lose 1–2 hours every day to data retrieval — not analysis

The Cost of Status Quo

Quantifying manual processes and unreliable AI

QUERY TIME — MANUAL VS DETQ

Complexity	Manual today	With DetQ	Time saved
Simple	2–5 min	<1 min	~4 min
Medium	15–20 min	<1 min	~18 min
Complex	60–90 min	<1 min	~75 min

GENERIC AI
HALLUCINATION
RATE

15–
70%

Atil et al., 2025

DetQ: 0%

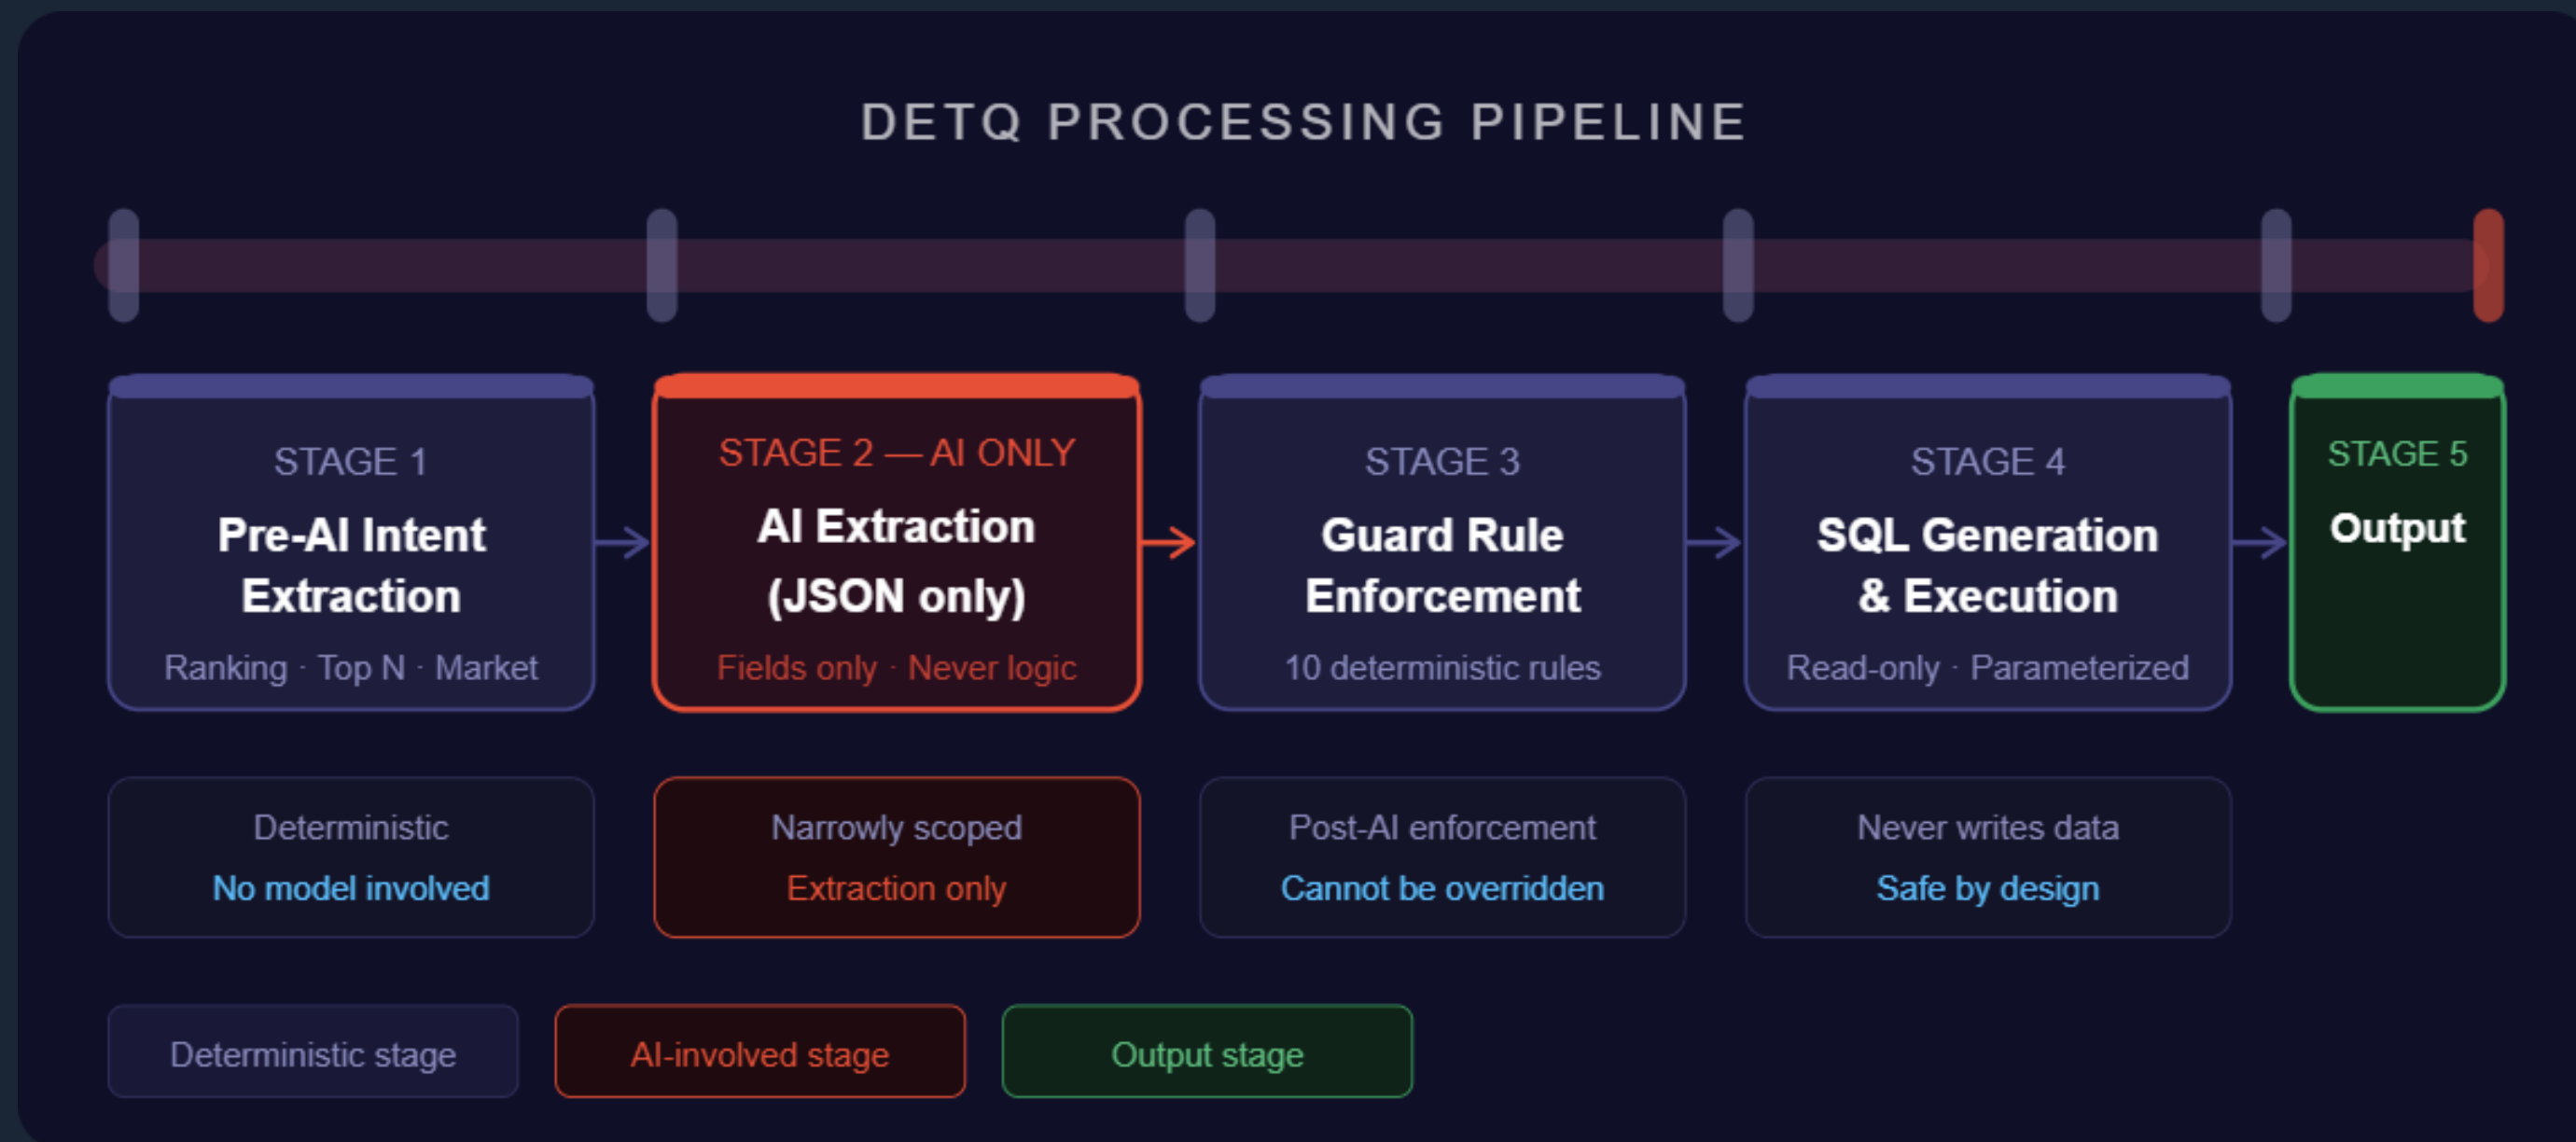

Source: Internal analyst survey data - Atil et al. (2025) on probabilistic AI hallucination rates in financial contexts

No self-service option exists — every query requires analyst intervention

Introducing DetQ

The solution for deterministic query processing

DetQ Pipeline

Zero Hallucinations

Generic

Generic AI systems carry a **15-70% hallucination rate**, making them unreliable for financial contexts and increasing risks in data analysis and reporting.

AI's Role

Field extraction only, no logic.

Guard Rules

Enforce explicit user input consistently.

Overcoming Excel Limitations

Analyst Thinking

DetQ comprehensively understands the nuances of **analysts' thought processes**, enabling precise query responses beyond mere keywords.

Timeframe Parsing

Built-in parsing allows for **seamless interpretation** of timeframes, ensuring accurate deal-level results without mixed result sets.

Deterministic Financial Intelligence

Auditable Pipeline

Queries flow through a **fixed, auditable pipeline**, ensuring transparency and accountability in every step.

Consistent Output

DetQ guarantees **fully reproducible results**, meaning the same query yields identical outputs over time.

Data Integrity

The **read-only architecture** maintains data integrity, preventing any modifications to the original datasets during queries.

Compound Queries

DetQ efficiently **unlocks analyst-grade compound queries**, enabling complex analyses to be performed instantly.

Analyst-Grade Compound Queries

Multi-Filter Efficiency

DetQ processes multi-filter queries rapidly, reducing analysis time from hours to mere seconds for analysts.

Example Query

Top 5 tightest spread YFIN deals rated AAA in 2025 can be executed in seconds with accurate results.

Validation

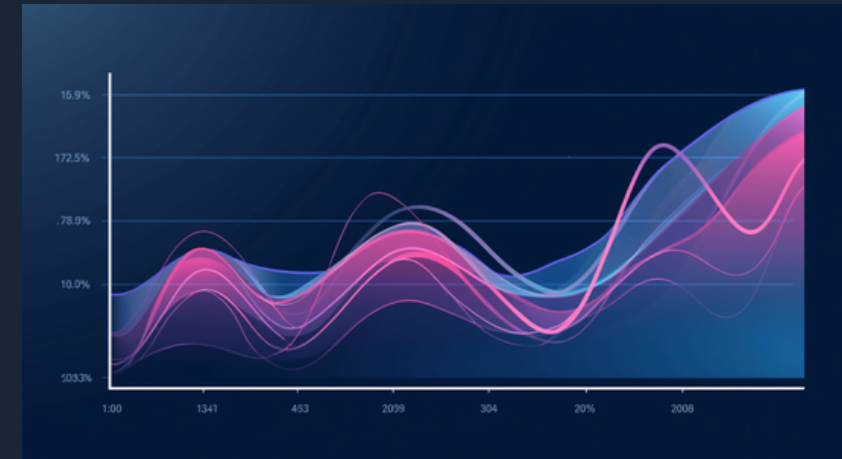

This capability has been validated against over 50 query patterns by experienced bond analysts in the field.

Validated DetQ Production Prototype

Coverage

2.3M+ data points across markets

Analyst Validation

Validated across 50+ query patterns

Client Engagement

Syndicate desks, buy-side, credit teams

A Structured Consulting Approach

Phase 1

Discovery involves schema mapping and query analysis over two weeks.

Phase 2

Configuration focuses on guard rules and development deployment over two weeks.

Phase 3

Validation includes analyst user acceptance testing over a two-week period.

Phase 4

Deployment covers launch and hypercare, also lasting two weeks.

Total Time

The entire engagement requires 8-12 hours across 6-8 weeks.

Recovered Time Value and Financial Benefit

Time Loss

Analysts lose 1-2 hours daily retrieving data, costing \$15K-\$30K annually.

Team Impact

A team of six analysts risks \$90K-\$180K in annual time value.

Year 1 ROI

Significant positive ROI is expected within eight months of implementation.

Year 2+

Full recurring benefits will be realized with minimal ongoing support costs.

FTE Recovery

Equivalent to 0.4-0.8 analyst positions freed for high-value work.

Metric	Value
Hours lost per analyst/day	1-2 hrs
Annual time value per analyst	\$15K-\$30K
Team of 6 annual exposure	\$90K-\$180K
Payback Period	<8 Months

Streamlined Collaboration

Database Schema

A one-time export takes about 1-2 hours to complete.

Sample Queries

Provide 20-30 real queries from analysts, also one-time.

Read-Only Access

Grant read-only access for the DetQ service account only.

UAT Validation

Two sessions required for analyst validation, lasting 2 hours each.

Configuration Handling

DetQ will manage all integration and configuration processes seamlessly.
